(57) Abstract:

PROBLEM TO BE SOLVED: To enable true cause of an error to be rapidly specified even when a plurality of related errors are generated.

SOLUTION: An error treating means 300 for displaying an error message is constituted by providing with a first means 310 for detecting error states of various kinds of apparatuses based on detecting signals from various kinds of sensors and a second means 312 for outputting the error message corresponding to combination of a plurality of detected error states. The second means 312 is constituted by providing with a retrieving means 322 for retrieving an error pattern of this time formed by combination of a plurality of detected error states from an information table 320 and a message output means 324 for reading out the error message corresponding to the error pattern of this time and outputting the error message to a display part 204, for example, when the error pattern of this time is present in the information table 320.
